In our pursuit to craft the finest Bordeaux varietals possible, each HALL estate vineyard was strategically chosen for its elevation, micro-climates and soil type. Director of Vineyards, Don Munk, and his viticulture team, employ small-vine farming to produce low-yield, highly concentrated fruit. Each vineyard block is managed uniquely – farming practices are adjusted according to varietal, terroir, clone, rootstock, and row orientation. We farm for highest quality fruit and employ organic practices to ensure vineyard health and optimum fruit character.
